Cal EOC Incident - 2014 Drought

• SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- A storm system will continue to bring precipitation to much of Northern California through tonight. A few showers may linger over the mountain areas Tuesday as the storm exits into the Great Basin. Expect cooler than average temperatures for much of this week.
- Flash Flood Watch from 1000 hours this morning to 2100 hours this evening for areas in Amador, Calaveras, Colusa, Lake, Solano, and Yolo Counties.
- Freeze Warning in effect from 2200 hours this evening to 0900 hours Tuesday for areas in Del Norte, Humboldt, Mendocino, and Trinity Counties.

Active Weather Warnings, Watches and Advisories by County:

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Numerous showers are expected through the day as an upper trough moves across the area. A few thunderstorms are possible along the Redwood Coast this morning and over the interior during the afternoon. Snow levels will remain at around 3500 to 4000 feet today, and freezing temperatures are expected throughout interior valleys tonight.

Medford Weather:

The upper low will bring a cold and showery air mass to the area today. Instability will bring a slight chance for thunderstorms across inland areas as well as near the coast this afternoon. The cold air mass will remain in place bringing cold low temperatures tonight and Tuesday morning across inland areas. A shortwave ridge is forecast to move into the area Tuesday bringing dry weather. Then a cold front will move into the area from the northwest late Tuesday night and Wednesday bringing light precipitation to the area.

Reno Weather:

A cold winter storm will bring snow showers through Tuesday morning. Snow showers will create some slick roads in the Sierra today with more widespread slick road conditions tonight and Tuesday morning. Dry and cold conditions Wednesday will be followed by a slow warming trend the remainder of the week.

San Francisco Weather:

Showers will spread across the entire region today and there is a slight chance of thunderstorms. Some of the heavier showers and thunderstorms may produce small hail. Showers will gradually taper off tonight but a few showers may linger into Tuesday morning across the southeastern portion of the region. Otherwise Tuesday will be a dry and cool day. A couple of very cool nights are forecast for Tuesday night and Wednesday night. Patchy frost is likely in the inland valleys late Tuesday night and early Wednesday. Dry and seasonable weather is forecast midweek through Saturday with the next chance of rain by Sunday.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

A weather system will move across Northern California bringing rain, mountain snow showers and a chance of thunderstorms. Dry weather returns by midweek.

Hanford Weather:

A storm system will bring showers and higher elevation snow to much of the central California interior through tonight. Isolated thunderstorms are possible in the San Joaquin Valley and adjacent foothills this afternoon into early this evening. Showers will linger over the mountains as the storm exits into the Great Basin. The remainder of the week will be dry with patchy night and morning fog in the San Joaquin Valley.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Moist unstable air behind a cold front will bring a chance of showers to the region into tonight with a slight chance of thunderstorms across northern sections tonight and there could be light snow accumulations in higher elevations. After lingering showers Tuesday, mainly in the mountains, dry weather is expected through the weekend. There will be a gradual warming trend beginning Wednesday, with above normal daytime temperatures Thursday through the weekend.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

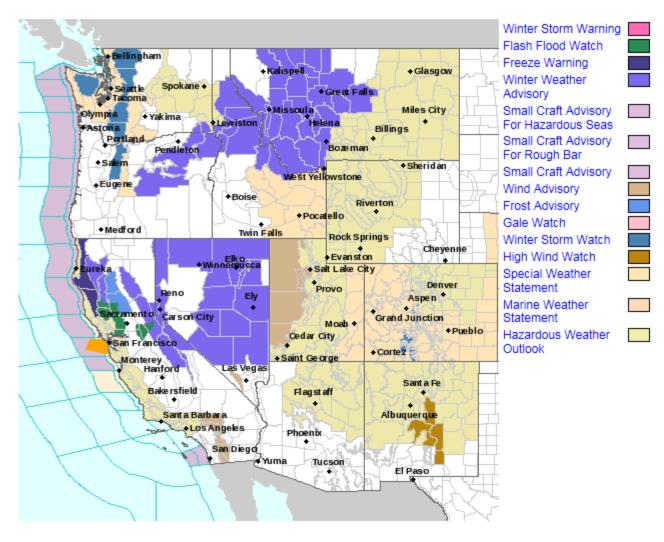

Through Tuesday, a low pressure system from the northwest will move through Southern California. This will bring cooling, stronger onshore flow with gusty west winds in the mountains and deserts, a chance of showers this afternoon, and scattered showers for late tonight through Tuesday morning. Warmer and dry conditions for Wednesday through next weekend with gusty northeast winds near the coastal foothills for Thursday and Friday.

Southeast California Weather:

A temporary cool down is in store starting Tuesday as a low pressure system will sweep through the Four Corners area bringing increased cloud cover and locally breezy conditions. A gradual warming trend will begin on Wednesday and continue through the remainder of the week as high pressure builds back across the region.

CAL OES 2014 DROUGHT

Cal EOC Incident - 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident - 2014 Drought
